

PORTABLE PACE CLOCK

310 mm Face Diameter

Motor, Start/Stop and Hand Reset

This Portable Pace Clock is an update on the previous model. Water-resistant and made from sturdy blue moulded UV-resistant plastic with an easy carry handle insert at the back for portability.

High torque quartz clock movement with continuously moving red second hand and black minute hand. 5 second numbers and indicators can be clearly read.

The Start/Stop button at the back conserves battery life when not in use with a reset dial to set the large minute hand in any position.

Shipped flat packed with some basic assembly required.

Phillips head screwdriver required and 5 minutes to assemble.

Supplied with 1 x AA battery and instructions.
