

POOL HARMONY. YOUR WATER IN PERFECT BALANCE

- Automated water analysis and self-adjustment
- Maintains optimum water quality all year round
- Total control over sanitiser levels and pH
- Compatible with all salt and mineral pools
- Reduces pool maintenance time
- Simple to use
- Made in Australia
- 3 year warranty

THERALUX WATER MANAGEMENT SYSTEM

Theralux Water Management System (TheraluxWMS) is an Australian made dosing system, designed to take the guess work out of swimming pool management. Giving total peace of mind, TheraluxWMS will automate the analysis and adjustment of your sanitiser and pH levels in your swimming pool, without you lifting a finger.

Whenever your pump is running, your WMS is put to work. The TheraluxWMS tests the water continuously and precisely doses over 30 times each hour if required. The WMS measures pH (a measure of the acidity of pool water) and ORP (Oxidation Reduction Potential – a measure of the level of effective chlorine in the water). It is important that both pH and ORP are maintained within a safe range.

The TheraluxWMS is suitable for pools of all shapes and sizes and gives you total control over the balance of your pool. The WMS uses a multi-electrode probe to analyse water quality whenever the system is running, delivering precise doses of sanitiser and acid, to maintain optimum water quality. Dosing is via a highly efficient peristaltic pump and the sanitiser by a separate Mineral or Salt Water Chlorinator.

FEATURES AND BENEFITS

- Intelligent water analysis of pH and ORP
- Automatically adjusts levels to achieve optimum water balance
- Provides clear, safe and healthy water all year round
- Reduces pool maintenance time
- 3 year warranty
- Australian made
